

**Intimation of next date in court cases through SMS especially in lower courts.**

It is seen that cases in lower courts are pending for years together. I have seen that cause list etc is computerized almost for all courts including district courts. There must be a system where mobile no. of parties is registered and they are intimated next date of hearing and also reason for giving next date.

This will help in breaking nexus of lawyers-judges and will bring great transparency in the system.
