

Open blood Portal

Aim : Provide online database of volunteer blood donors, so any one can search and contact him , city wise ,location based db.

Today blood requirements is very high in almost every areas of india and there are blood banks to provide but , blood banks have business model and blood donor's when they donate these blood bank's sell at high price

So i want an online government portal like :

<http://www.obbg.in/search-donor>

So , person in need can get blood by online search about donors info.
